Dear Dr. Andrei Pereira Pernambuco,

We are pleased to submit for your consideration the manuscript "**DISTRIBUTION OF DENTAL SCHOOLS IN MINAS GERAIS STATE, BRAZIL, 2016**".

Our study showed that there are 30 dental courses operating in Minas Gerais that are offered seven in public institutions and twenty-three in private institutions. Moreover, the distribution of the courses was uneven by state regions with the highest concentration in metropolises located in Regios with better socioeconomic conditions.

Acknowledge the journal as an important means scientific communication and that is ideal for reporting the article.

Best Regards,

Emílio Prado da Fonseca
DD Student of Piracicaba Dental School FOP/UNICAMP, Brazil
